Enclosed is a copy of a letter sent to the parent(s) of your patient. According to our records, this baby was recently diagnosed with a slight hearing loss. A follow-up audiological evaluation is recommended between 9 and 12 months of age (by an audiologist with skill in assessing pediatric patients). As you know, it is difficult to quantify a young child's hearing through observation alone, therefore it is important that this child be evaluated as recommended. Speech and language development is typically impacted by hearing loss, and may be affected by even slight hearing loss. It is recommended that you continue to monitor this baby's hearing/language milestones at well-baby check-ups. Please feel free to contact me at (317) 232-0972 should you have any questions or concerns. Thank you for your time.
